Index to Volume 75, 2010

	Issue	Page
A case study for azimuthally anisotropic prestack depth imaging of an onshore Alaska prospect, Jinming Zhu, John Mathewson, and Gail Liebelt	4	B177
A comparative study of in-river geophysical techniques to define variations in riverbed salt load and aid managing river salinization, Michael Hatch, Tim Munday, and Graham Heinson	4	WA135
A comparison between methods that discriminate fluid content in unconsolidated sandstone reservoirs, Zhengyun Zhou and Fred Hilterman	1	B47
A comparison of passive seismic monitoring of fracture stimulation from water and CO_2 injection, James P. Verdon, J. Michael Kendall, and Shawn C. Maxwell	3	MA1
A curve-fitting technique for determining dispersion characteristics of guided elastic waves, Xiao-Ming Tang, Chen Li, and Douglas J. Patterson	3	E153
A frequency-approximated approach to Kirchhoff migration, Mark E. Vardy and Timothy J. Henstock	6	S211
A generalization of the Fourier pseudospectral method, José M. Carcione	6	A53
A generalized Archie's law for *n* phases, Paul W. J. Glover	6	E247
A hybrid scheme for absorbing edge reflections in numerical modeling of wave propagation, Yang Liu and Mrinal K. Sen	2	A1
A laboratory study of the effect of Fe(II)-bearing minerals on nuclear magnetic resonance (NMR) relaxation measurements, Kristina Keating and Rosemary Knight	3	F71
A method to determine the magnetotelluric static shift from DC resistivity measurements in practice, Simona Tripaldi, Agata Siniscalchi, and Klaus Spitzer	1	F23
A new misfit function for multimodal inversion of surface waves, Margarita Maraschini, Fabian Ernst, Sebastiano Foti, and Laura Valentina Socco	4	G31
A perspective on 3D surface-related multiple elimination, Bill Dragoset, Eric Verschuur, Ian Moore, and Richard Bisley	5	75A245
A simple model for squirt-flow dispersion and attenuation in fluid-saturated granular rocks, Boris Gurevich, Dina Makarynska, Osni Bastos de Paula, and Marina Pervukhina	6	N109
A solution to the airwave-removal problem in shallow-water marine EM, Lars O. Løseth, Lasse Amundsen, and Arne J. K. Jenssen	5	A37
A tracer test in a shallow heterogeneous aquifer monitored via time-lapse surface electrical resistivity tomography, Martina Monego, Giorgio Cassiani, Rita Deiana, Mario Putti, Giulia Passadore, and Lorenzo Altissimo	4	WA61
A transversely isotropic medium with a tilted symmetry axis normal to the reflector, Tariq Alkhalifah and Paul Sava	3	A19
Abdel-Aal, Radwan E., see Ahmed, Osama A.	1	P1
Accelerating migration deconvolution using a nonmonotone gradient method, Yanfei Wang and Changchun Yang	4	S131
Accurate data reconstruction through simultaneous applicaton of statistical and physics-based constraints to multiple geophysical data sets, Anatoly Baumstein and Ramesh Neelamani	6	WB165
Acoustic and elastic numerical wave simulations by recursive spatial derivative operators, Dan Kosloff, Reynam C. Pestana, and Hillel Tal-Ezer	6	T167
Acoustic VTI modeling with a time-space domain dispersion-relation-based finite-difference scheme, Yang Liu and Mrinal K. Sen	3	A11
Acquisition footprints and seafloor coupling in multicomponent OBC seismic data, R. James Brown	1	Q11
Acworth, R. Ian, see Greve, Anna K.	4	WA85
Adaptive subtraction using complex-valued curvelet transforms, Ramesh (Neelsh) Neelamani, Anatoly Baumstein, and Warren S. Ross	4	V51
Ahmed, Osama A., Radwan E. Abdel-Aal, and Husam AlMusta, Reservoir property prediction using abductive networks	1	P1
Akça, Irfan and Ahmet Tuğrul Basokur, Extraction of structure-based geoelectric models by hybrid genetic algorithms	1	F15
Aleixo, Rafael, see Amazonas, Daniela	2	S51
Aleixo, Rafael, see Amazonas, Daniela	5	S175
Alkhalifah, Tariq and Paul Sava, A transversely isotropic medium with a tilted symmetry axis normal to the reflector	3	A19
Alkhalifah, Tariq and Sergey Fomel, An eikonal-based formulation for traveltime perturbation with respect to the source location	6	T175

	Issue	Page
Alkhalifah, Tariq, Prestack phase-shift migration of separate offsets in laterally inhomogenous media	3	S95

Amundsen, Lasse, see Løseth, Lars O.	5	A37
An anisotropic model for the electrical resistivity of two-phase geologic materials, Michelle H. Ellis, Martin C. Sinha, Tim A. Minshull, Jeremy Sothcott, and Angus I. Best	6	E161
An eikonal-based formulation for traveltime perturbation with respect to the source location, Tariq Alkhalifah and Sergey Fomel	6	T175
An improved method for hydrofracture-induced microseismic event detection and phase picking, Fuxian Song, H. Sadi Kuleli, M. Nafi Toksöz, Erkan Ay, and Haijiang Zhang	6	A47
An interferometric theory of source-receiver scattering and imaging, David Halliday and Andrew Curtis	6	SA95
Analysis of prior models for a blocky inversion of seismic AVA data, Ulrich Theune, Ingrid Østgård Jensås, and Jo Eidsvik	3	C25
Analysis shows Geophysics is world's premier applied-geophysics journal	5	75A273
Analytic signals of gravity gradient tensor and their application to estimate source location, Majid Beiki	6	I59
Analytic solution of the gravity anomaly of irregular 2D masses with density contrast varying as a 2D polynomial function, Xiaobing Zhou	2	I11
Anderson, Barbara I., see Cook, Ann E.	6	F173
